A GUIDE TO THE MISSION

"I believe this nation should commit itself, before the decade is out, to landing a man on the moon and returning him safely to earth. No single space project will be more impressive to mankind. . . ."
—President John F. Kennedy, May 1961

"I believe this generation of apes should commit itself, before the market closes, to landing an ape on the moon and driving a Lunar Lamborhini through the Sea of Tranquility. No single financial project will be more impressive to mankind. . . ."
—Retard u/zedinstead, June 2021

Go / No-Go for Launch

u/nothingbuttherainsir had created a checklist for the upcoming launch. The last update on May 28 has the rocket "just about cleared for launch" and on a scheduled HODL. Perhaps with the recent movement on 005 we'll see an update from OP and inch ever closer to liftoff.
